Performance data quoted represents past performance, and is no guarantee of future results. Principal value and return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance shown here.

Returns are not annualized for periods under one year.

The non-standardized adjusted historic average annual returns before surrender charge are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. Performance does not reflect the deduction of the surrender charge which, if reflected, would reduce the performance figures shown. The maximum surrender charge is 7% of premium payments.

The non-standardized adjusted historic average annual performance before surrender charge assumes that the Sentinel Advantage contract had been available since the inception of the underlying fund options and that the subaccounts were available as options under the contract.

An investment in the Money Market subaccount is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Money Market seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this account.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility.

Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

An investment in the Money Market subaccount is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Money Market seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this account.

Performance shown for Illuminations is the performance of the Model Portfolio, and reflects portfolio rebalancing on May 1st and November 1st of each year. Your own performance will generally be different from the Model Portfolio's because of the effect of various factors, including the cash flows in your account, the actual dates on which your account is rebalanced, and that you may have chosen to modify the Model Portfolio for your own account. The portfolios included in the Model Portfolio may change from time to time. Performance shown prior to any such change is based on the prior portfolio composition.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility.

Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

Variable annuities are long-term investments designed for retirement purposes. Early withdrawals may be subject to a deferred sales charge and if taken prior to age 59½, a 10% federal tax penalty may apply. Gains distributed from the annuity will be taxed as ordinary income in the year the money is received.

¹ Inception date of the underlying fund option² Average annual return since the inception of the underlying fund option³ Most recent calendar quarter

Performance data quoted represents past performance, and is no guarantee of future results. Principal value and return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance shown here.

Returns are not annualized for periods under one year.

The non-standardized adjusted historic average annual returns before surrender charge are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. Performance does not reflect the deduction of the surrender charge. The maximum surrender charge is 7% of premium payments.

The non-standardized adjusted historic average annual performance before surrender charge assumes that the Sentinel Advantage contract had been available since the inception of the underlying fund options and that the subaccounts were available as options under the contract.

An investment in the Money Market subaccount is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Money Market seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this account.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility.

Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

An investment in the Money Market subaccount is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Money Market seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this account.

Performance shown for Illuminations is the performance of the Model Portfolio, and reflects portfolio rebalancing on May 1st and November 1st of each year. Your own performance will generally be different from the Model Portfolio's because of the effect of various factors, including the cash flows in your account, the actual dates on which your account is rebalanced, and that you may have chosen to modify the Model Portfolio for your own account. The portfolios included in the Model Portfolio may change from time to time. Performance shown prior to any such change is based on the prior portfolio composition.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility.

Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

Variable annuities are long-term investments designed for retirement purposes. Early withdrawals may be subject to a deferred sales charge and if taken prior to age 59½, a 10% federal tax penalty may apply. Gains distributed from the annuity will be taxed as ordinary income in the year the money is received.

Performance data quoted represents past performance, and is no guarantee of future results. Principal value and return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance shown here.

Contract inception date was 7/1/1997.

The standardized average annual returns are shown as a net rate of return which reflects the portfolios' investment income and capital gains and losses less investment management fees and expenses, and reflects the mortality and expense risk charge of 1.25%, an asset based administrative fee of .15% and an annual contract charge of \$30. Performance reflects the deduction of the surrender charge which reduces the performance compared to performance under the assumption that the contract is not surrendered. The maximum surrender charge is 7% of premium payments. The surrender charge schedule applies to each premium payment and declines 1% for each completed contract year since payment.

An investment in the Money Market subaccount is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the Money Market seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in this account.

Stocks of smaller companies are often associated with higher risks than stocks of larger companies including higher volatility. Investment in global markets may include added risks such as currency fluctuations and other economic and political factors.

Returns are not annualized for periods under one year.
